Dear Colleague:

I am pleased to provide you with a copy of Wisconsin Crime and Arrests-1988. This report is based upon monthly crime and arrest reports submitted by more than 280 law enforcement agencies throughout Wisconsin. We greatly appreciate the continued efforts of personnel from these agencies in collecting and reporting important crime and arrest data.

The first half of the report presents statewide information on crime and arrests and sections on individual serious crimes. The second half of the publication contains detailed crime and arrest information for individual law enforcement agencies within the State, organized alphabetically by county.

Some of the more important findings are summarized at the beginning of the report (see page 3 - 1988 Crime and Arrest Facts At A Glance). These include a decline in the number of serious crimes reported and a five percent increase in total arrests (including substantial increases in cocaine-related arrests).

If you have any suggestions for improving the report in future years, please let me know. Also, if you require additional copies, please contact this office.

I hope this report meets your needs and you will find it useful. Please contact our office if you need other crime-related statistics.

Sincerely,

Ted Meekma

Crime and Arrests in Wisconsin - 1988

Introduction

This report, prepared by the Wisconsin Statistical Analysis Center (SAC), presents data on crime and arrests in Wisconsin during 1988. From 1970 through 1981 the state Uniform Crime Reporting (UCR) Program, operated by the Crime Information Bureau of the Wisconsin Department of Justice (DOJ), collected, compiled, and reported crime and arrest data for Wisconsin. Beginning in 1971, DOJ also provided data to the national UCR system, a program of the Federal Bureau of Investigation (FBI). Effective December 31, 1981, the state program operated by DOJ was discontinued. The 1981 data collected by DOJ were transmitted directly to the FBI, and the 1981 Wisconsin Crime and Arrests report, prepared by SAC, was based for the most part on information provided to SAC by the FBI. In 1982 and again in 1983 Wisconsin law enforcement agencies transmitted their UCR data directly to the FBI, but in addition provided copies of the the principal offense and arrest forms to the Statistical Analysis Center. As of 1984, Wisconsin resumed its status as part of the national UCR system. Since 1984, Wisconsin law enforcement agencies have provided complete UCR data to SAC, which in turn has transmitted the data to the FBI via computer tape.

The National UCR Program

The national Uniform Crime Reporting Program was initiated in 1930 by the International Association of Chiefs of Police (IACP). After soliciting input from law enforcement agencies throughout the country, an IACP committee developed uniform crime definitions and reporting procedures which could be used by law enforcement agencies in every state. The FBI was designated as the national clearinghouse for UCR data. The Committee on Uniform Crime Records of the IACP continues to serve the national program in an advisory capacity. In 1956, the National Sheriff's Association also established a Committee on Uniform Crime Reports to act as an advisory body to the program. The FBI regularly receives data on reported crime and arrests from law enforcement agencies throughout the country. The data are provided either by individual law enforcement agencies or by state UCR programs which collect and compile data for their states and convey the data to the FBI. From these data the FBI publishes its annual report, Crime in the United States.

The Wisconsin UCR Program

The FBI recognized the Wisconsin Council on Criminal Justice (WCCJ) as the administrator of the Wisconsin State Uniform Crime Reporting Program effective January 1, 1984. It should be noted that the WCCJ was changed to the Office of Justice Assistance as of October 1, 1987. As indicated above, the original Wisconsin UCR program, operated by DOJ, was discontinued in 1981. The program operated by DOJ from 1970 through 1981 required that all law enforcement agencies submit UCR data either directly or through the county sheriff's office. It also required that DOJ submit the prescribed data to the FBI. DOJ expanded the national UCR program's classifications to collect more detailed and appropriate data on Wisconsin crime and arrests. From the statewide UCR data, DOJ published its annual report Wisconsin Crime and Arrests, as well as quarterly, semi-annual, and other summary reports.

In November, 1981, the WCCJ received a grant from the United States Department of Justice, Bureau of Justice Statistics, to develop the Wisconsin Statistical Analysis Center. The SAC was mandated by executive order to collect and analyze criminal justice data, produce statistical reports on crime and the justice system, and promote development of criminal justice information systems. From 1981 through 1983, SAC assumed a substantial number of the functions of the state UCR

program to meet the information needs of state and local criminal justice decision-makers, elected officials and interested citizens. Since January, 1984, Wisconsin once again has designated a State UCR Program officially recognized by the FBI and part of the national system of state UCR programs.

Issues in Comparison of this Report with Earlier Reports

Care should be exercised in making comparisons of the data in this report with the data contained in previous annual reports. Adjustments may be required for the following reasons:

-- Shifting of a law enforcement agency from one population category to another based on annual re-estimation of the jurisdiction's population.

-- On occasion, the Federal Government designates an additional Wisconsin county as being included in a Standard Metropolitan Statistical Area. This would shift a Sheriff's Office from the Rural Areas category to the Suburban Sheriffs' group. (See footnote 5 on page 15 for a listing of Suburban Sheriffs' Offices.)

-- Populations are estimated for non-census years. Rates for 1988 are calculated using 1980 census data, updated with 1988 estimates published by the Demographic Services Center, Wisconsin Department of Administration.

-- County totals shown in Tables 1-9 of this report are estimates which compensate for instances of missing data when appropriate. In the 1981 Wisconsin Crime and Arrests report, these totals were actual totals of data reported, even when data were missing. Thus, caution should be exercised in comparing county totals of 1981 with subsequent years.

-- Both adult and juvenile 1981 arrest data for the City of Milwaukee published in the 1981 Wisconsin Crime and Arrests have been revised. Readers interested in comparing 1981 Milwaukee data with other years are urged to contact SAC.

1988 Crime and Arrest Facts At A Glance

One VIOLENT CRIME every 50 minutes

- One MURDER every 2 days, 12 hours
- One RAPE every 8 hours, 42 minutes

[1] The crime clock should be viewed with caution. Since it is the most aggregate representation of UCR data, it is designed to convey the annual reported crime experience by showing the relative frequency of Index Offense occurrence. This method of display does not imply a regularity in the commission of Index Offenses; rather it shows the ratios of crimes to fixed periods of time.

An Overview of 1987 and 1988 Crime and Arrests in Wisconsin

The following tables and maps present an overview of 1987 and 1988 crime and arrests in Wisconsin. Table 1 shows that reported Index Offenses have decreased by 3.5 percent from 1987. While reported violent offenses have decreased by 13 percent from 1987, property offenses have decreased by 2.9 percent. The overall decrease in violent offenses is due to decreases in murder, forcible rape and, particularly, aggravated assault. Murder decreased by 14.7 percent, from 170 to 145. Forcible rape decreased by 3.6 percent, from 985 to 950. Aggravated assault decreased by 20.6 percent, from 7,659 to 6,078. However, robbery increased by 2.5 percent, from 3,175 to 3,254. It should be noted that violent offenses constituted only 5.4 percent of Index Offenses for Wisconsin in 1988.

Property crimes comprise the balance of the Crime Index. The overall decrease in reported property crimes from 1987 to 1988 is due to substantial decreases in reported burglary and theft. However, reported motor vehicle theft and arson increased during 1988. Burglary decreased by 12.3 percent, from 40,348 to 35,373. Theft decreased by 1.3 percent, from 135,654 to 133,838. Motor vehicle theft increased by 10.5 percent, from 11,803 to 13,043, and arson increased by 6.1 percent, from 1,231 to 1,306.

The next three tables present a comparison of statewide arrests in 1987 and 1988. Adult arrests for total Index Offenses decreased by 2.0 percent, while juvenile arrests for total Index Offenses decreased by 1.4 percent. Total arrests for Index Offenses, combining both adults and juveniles, decreased by 1.8 percent. Juvenile arrests constituted 43.4 percent of all arrests for Index Offenses in 1988, compared to 43.2 percent in 1987. Total adult arrests rose by 6.4 percent, from 221,788 to 235,970 while total juvenile arrests increased by 1.0 percent, from 88,103 to 88,959. Total arrests for adults and juveniles combined increased by 4.8 percent from 309,890 in 1987 to 324,929 in 1988.

Juvenile arrests comprised 27.4 percent of all arrests for 1988, but they comprised 43.4 percent of arrests for Index Offenses. Among the Index Offenses, juvenile arrests comprised 18.2 percent of all arrests for violent offenses and 46.5 percent of all arrests for property offenses.

Following the set of four tables are two maps showing rates of violent and property crime in each Wisconsin county for 1988. On each map, counties are ranked in four groups according to number of offenses per 100,000 population. The statewide rate, shown on each map, is based on the statewide number of offenses and population. This rate is within the fourth quartile because most of the highest crime rates are in those counties with largest populations.

An analysis of total Index Offenses, violent offenses, property offenses, and each separate offense appears in the following section of this report. Ten-year trends in offenses, offense rates, clearances, and arrest ratios are then presented, followed by data on law enforcement officers killed and assaulted.

CRIME INDEX OFFENSES

Definition:[1] Crime Index Offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft, and arson. Attempts are included (an attempted murder is classified as an aggravated assault).

1988 Summary Analysis

- There were an estimated 193,987 Crime Index Offenses reported during 1988, a 3.5 percent decrease from 1987.
- One Index Offense was reported approximately every two minutes, 43 seconds during 1988.
- The most frequent month for Crime Index Offenses was August (19,419), the least frequent was February (12,368).
- The Crime Index Offense rate per 100,000 Wisconsin residents was 4,028.4 in 1988, a decrease of 3.9 percent from the 1987 rate of 4,192.9 per 100,000.
- The 1988 rate of 4,028.4 per 100,000 is approximately 30 percent less than the estimated 1988 rate of 5,716 per 100,000 residents for the nation.
- In terms of the population groupings of Wisconsin jurisdictions, the larger the population category, the higher the rate of Index Offenses.
- Total Index Offenses have increased by 6.1 percent between 1978 and 1988.
- An estimated total of 57,720 persons were arrested for Index Offenses in 1988. Of these, 56.6 percent were adults.
- Overall, 23.8 percent of Index Offenses were cleared in 1988. This rate varied widely, however, from over 79 percent for murder to 14.7 percent for burglary. The 1988 clearance rate of 23.8 percent was somewhat less then the 1987 rate of 24.3 percent.

VIOLENT OFFENSES

Definition: Four Crime Index Offenses involve face-to-face confrontation between victim and perpetrator, and are referred to as violent offenses. These are murder and nonnegligent manslaughter, forcible rape, robbery and aggravated assault.

1988 Summary Analysis

- There were an estimated 10,427 violent offenses reported during 1988, a 13.0 percent decrease from 1987. This was the largest decrease in violent crime during the past decade.
- Violent Index Offenses accounted for 5.4 percent of the total Crime Index in 1988.
- Approximately one violent offense was reported every 50 minutes during 1988.

SEXUAL ASSAULT AND FORCIBLE RAPE

Definition: Sexual assault is sexual contact or sexual intercourse with another person without consent of that person. Sexual assault is proscribed under Wisconsin statutes, but is not part of the Federal Uniform Crime Reporting (UCR) Program. Forcible rape is part of the Crime Index and as such is reported as part of the Federal UCR Program. It is the carnal knowledge of a female forcibly and against her will. Assaults or attempts to commit rape by force or threat of force are also included; however, statutory rape (without force) is not included.

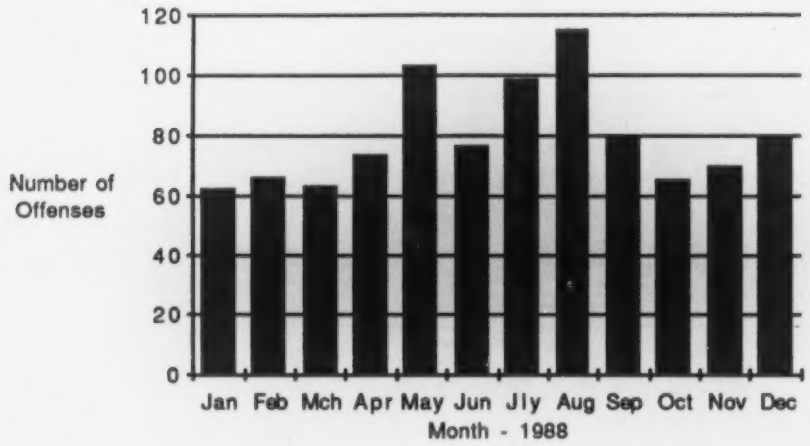
FORCIBLE RAPE - BY MONTH



Sexual Assault - 1988 Summary Analysis

Information on sexual assault is vital to an understanding of crime trends in Wisconsin. Rape is not a legally meaningful category in this state. However, rape is part of the Crime Index and information on rape is vital to the national UCR program. Furthermore, many years of information on rape are available for Wisconsin, and current information on rape is valuable for purposes of comparison. Jurisdiction-by-jurisdiction listings for rape appear in many of the tables at the end of this publication. This listing of rapes will continue in future years as long as rape continues to be part of the Crime Index.

Following are some highlights of the sexual assault figures presented on the following four pages.

- There were an estimated 5,169 sexual assaults reported during 1988, a 3.3 percent decrease from the estimated 1987 total of 5,345. (Note: these figures are estimated totals, all other figures used in this section are reported data.)
- Approximately 19 percent of all sexual assaults were rapes. For victims over 16, the proportion of rapes was more than twice as high, 37.5 percent.
- Approximately 74 percent of all sexual assault victims were juveniles. Nearly 65 percent of all victims were 15 years old or less.
- Victim sex was 86 percent female, while offender sex was 96 percent male.
- Nearly 73 percent of all sexual assaults were committed by family members or friends and acquaintances, while 15 percent were committed by strangers. For those sexual assaults that are rapes, nearly 59 percent were committed by family members or friends and acquaintances, and 33 percent by strangers.

SEXUAL ASSAULT

Summary data on sexual assaults are presented in the following tables and graphs. In the tables below, sexual assaults are shown by degree for all victims, victims 15 and under, and for victims 16 and over. This is because the two most severe degrees of assault, first and second, may be so classified either by the nature of the assault or the age of the victim. Looking only at assaults of victims age 16 and over shows the distribution of assaults by degree based solely on the nature of the assault, not victim age. Most sexual assaults, even first and second degree assaults, are not rapes according to the Uniform Crime Reporting definition, and this also is shown in the table below.

Graphs showing the age and sex of victims and offenders, and relationship between victim and offender, are presented on subsequent pages. Data are also presented on arrests, victim injury, and weapons used in the commission of sexual assaults.

Summary of Offense and Arrest Trends: 1978 - 1988

The following four tables present statewide data on: (1) the number of Index Offenses, (2) offense rates for Index Offenses, (3) clearance rates for Index Offenses, and (4) the ratio of arrests to offenses for Index Offenses for each year from 1978 through 1988. Each table shows the percent change from 1978 to 1988. Certain adjustments, noted in footnotes to each table, were made in the total Crime Index and property offense categories to make the data comparable from year to year.

The total number of known Index Offenses in Wisconsin increased from 1978 through 1981, declined through 1985, rose in 1986 and 1987, but decreased in 1988 (see graph, page 14). The number of Index Offenses increased by 6.1 percent for the decade, from 181,541 in 1978 to 193,987 in 1988[1]. The 3.2 percent increase in offense rates for the decade is less than the increase in number of offenses, because the population of the state increased during this period.

The number of violent offenses increased by 68.6 percent for the decade, from 6,184 in 1978 to 10,427 in 1988. The number of property offenses increased by 3.9 percent for the decade, from 175,357 to 183,560. Thus, while both violent and property offenses have increased during the past decade, the rate of increase has been much greater for violent crimes, especially since 1981. This is made clear in the graphs on pages 20 and 26.

While the clearance rates for all Index Offenses has increased since 1978, overall Violent Offense clearance rates have declined while Property Offense clearance rates have increased. Clearance rates increased during the decade for forcible rape. However, clearance rates for murder, robbery and aggravated assault have decreased. Among the property offenses, clearance rates have increased for theft while they have decreased for burglary and motor vehicle theft.

Overall, arrest ratios have increased over the past decade, indicating that during this time arrests have increased more rapidly than offenses. However, in terms of specific offenses, this is true only of murder, aggravated assault and theft. For these three offenses, arrests have increased more rapidly than offenses during the decade.

[1] The numbers used in this section are taken from the four tables that follow. As noted in the footnotes to the tables, the 1988 Total Index and property offense figures include arson data but, since the 1978 data do not include arson, the 1978 to 1988 percent change figures exclude 1988 arson offenses.

Law Enforcement Officers Killed and Assaulted

The following tables present statewide information on law enforcement officers killed or assaulted during 1988. During 1988, one Wisconsin police officer was killed due to an accident while in the performance of duty.

There were 929 reported assaults on police officers in 1988, a 4.5 percent increase compared to the 889 reported assaults in 1987. Of the 929 reported assaults, 895 or 96 percent were cleared. Over 60 percent of assaults occurred during the nighttime hours from 8 p.m. through 4 a.m. Injuries resulted from 50 percent of reported assaults, while 94 percent of assaults involved personal weapons (hands, feet or fists) rather than firearms, knives or other dangerous weapons. In addition, this section shows both the type of assignment and type of activity at the time the assault occurred and the number of assaults on law enforcement officers since 1984.

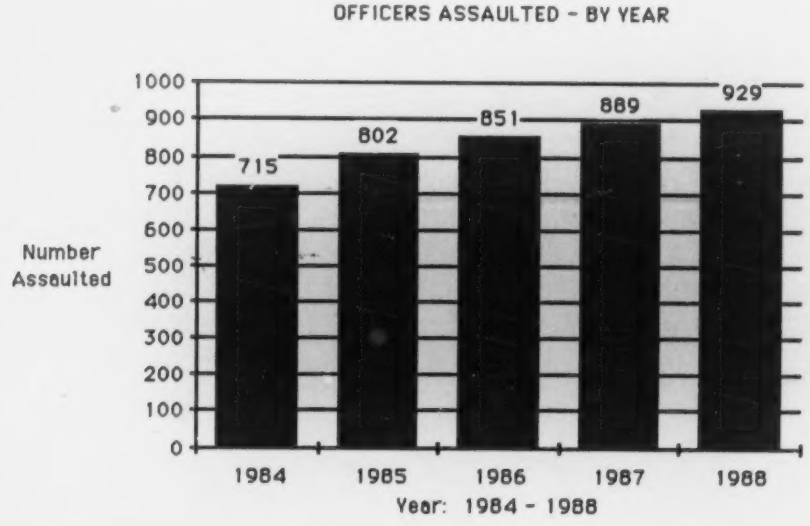
The percentage of officers assaulted when investigating suspicious persons or circumstances increased from 4.9 percent in 1987 to 9.3 percent in 1988.



The number of officers assaulted in Wisconsin has increased steadily by nearly thirty percent from 1984 (715 assaults) to 1988 (929 assaults).

Index Offenses by County and Law Enforcement Agency - 1988

Table 1. Number of Crime Index Offenses and Percent Change, 1987 - 1988

Table 1 shows Index Offenses for 1987 and 1988 and percent changes from 1987 to 1988 for each jurisdiction. The four violent Index Offenses are totaled to equal violent crimes, and the four property Index Offenses are totaled to equal property crimes. The Crime Index is the sum of all eight offenses.

In Table 1 the number of months of data reported for each jurisdiction is listed. This information is vital to the interpretation of the tabie, since the data presented are the reported data at the jurisdiction level, even when fewer than 12 months of data were available. Twelve months of data were reported for 95 percent of the jurisdictions. However, data for jurisdictions reporting less than four months are not printed although stimates for these jurisdictions are included in county and state totals (see below). There were eleven of these jurisdictions in 1988.

Data for a jurisdiction which reported for fewer than 12 months in 1988 cannot be directly compared with that jurisdiction's 1987 data or with data for other jurisdictions. Thus, no percent changes are shown for these jurisdictions. However, an approximate comparison can be made using an estimate of the 12 months total. This estimate can be calculated by multiplying the available data by a correction factor which is obtained by dividing 12 by the number of months reported. (For example if nine months of data are available for an agency, the data can be estimated for 12 months by multiplying the data by 12/9 or 1.33.) However, the accuracy of this approximation diminishes when only a few months of data are available. It should be applied with great caution when less than six months of data are available. This method should also be applied with caution when the number of offenses involved is small. For example, if jurisdiction A had 72 thefts in nine months and prorated them to 96 (12/9 x 72 = 96) thefts for the year, while jurisdiction B had three thefts in nine months and prorated them to four thefts for the year, the estimate for jurisdiction A would be more reliable because it had a higher number of offenses.

The percent change in the number of Index Offenses reported from 1987 to 1988 is shown in Table 1 for each jurisdiction for which it was possible to calculate the change. The percent change is calculated using the formula:

$$\frac{\text{(Offenses in 1988) - (Offenses in 1987)}}{\text{Offenses in 1987}} \times 100 = \text{Percent Change}$$

If the number of offenses for 1987 was zero, no percent change was calculated since percent change cannot be calculated from a zero base. In addition, as stated above, no percent change was calculated for a jurisdiction unless 12 months of data were available for both 1987 and 1988.

Table 1 shows county totals for each offense and percent change from 1987 to 1988. For those counties in which not every jurisdiction reported 12 months of data for 1987 or 1988, the county totals shown are estimates. The estimated county totals were obtained by summing the estimated annual totals for each jurisdiction within the county. These estimated annual totals were obtained as described above, by multiplying the available data by a correction factor for jurisdictions with four months or more of 1988 data. When less than four months of data were present, a different method of estimation was used. For these jurisdictions, the estimate used was the latest year of complete data. When estimates are used for county totals, the totals are so labeled in Table 1 (e.g., the notation "(EST)" follows the total for Barron County).

In addition, there were four new UCR reporters during 1988. These are River Hills PD (Milwaukee County), Phillips PD (Price County), Orfordville PD (Rock County), and Spring Green (Sauk County). Each of these county headings is marked by an asterisk in Table 1. Also, for each of these agencies, only 1988 data are printed since comparable 1987 figures were not avaialble. In certain cases (e.g., Price County Sheriff's Office), the 1987 and 1988 crime figures are not directly comparable because of the change in reporting by another agency (i.e., Phillips PD) in that county.

At the end of Table 1, statewide totals of reported offenses in each category and estimates of the actual statewide totals are shown. The statewide estimates were obtained by summing the estimated offenses for each jurisdiction.

Table 2. Offense Rates per 100,000 Population for Index Offenses, 1988

Table 2 presents offense rates per 100,000 population for Index Offenses for each jurisdiction. The populations shown in this table are from Official Population Estimates for 1988, published by the Demographic Services Center of the Wisconsin Department of Administration. The population shown for each county Sheriff's Office is the total population of the county minus the populations of any municipalities in the county for which UCR data were reported separately. The rates shown in Table 2 are derived by taking the number of reported offenses, shown in Table 1, dividing by the population of the jurisdiction, shown in Table 2, and multiplying by 100,000. These rates permit comparisons among jurisdictions of different sizes. Offense rates for agencies with 0 permanaent residents (e.g., UW Campus agencies, State Patrol or DNR) are not calculated.

As discussed in connection with Table 1, 12 months of data were available for 95 percent of jurisdictions. Since offense rates based on less than 12 months of data would be misleading, Table 2 presents rates only for those jurisdictions which reported 12 months of data. The countywide and statewide rates shown in Table 2 are based on estimated numbers of offenses when necessary, as described in connection with Table 1.

Table 3. Total Clearance Rates for Index Offenses, 1988

Table 3 presents total clearance rates by offense and jurisdiction. In Table 3, the various clearance rates are the number of clearances, divided by the number of offenses and multiplied by 100. That is, clearances are represented as a percentage of reported offenses. Note that no clearance rate can be calculated for an offense category if there are no 1988 offenses reported, even though clearances may be reported from prior years. When no offenses have been reported, a blank space appears in Table 3. When a clearance rate of zero is shown it means that at least one offense occurred, but that there were no clearances. Clearance rates greater than 100.0 percent are possible (e.g., murder clearance rate of 200.0 percent for Green Bay) when clearances are made of offenses which were reported in earlier years.

Since the clearance rate is the ratio of clearances to reported offenses, it is not particularly sensitive to the problems of missing data described above for Tables 1 and 2. It is reasonable to assume that this ratio would be fairly constant as long as the number of months of data available was reasonably large. Thus, clearance rates have been presented in Table 3 for all jurisdictions for which six months or more of clearance data were present. There were ten jurisdictions reporting fewer than six months of data which were excluded from the table. An asterisk (*) is printed next to the name of each of these jurisdictions. Countywide and statewide rates shown in Table 3 are based on estimated clearances and offenses, calculated as described above in connection with Table 1.

Table 4. Property Stolen, Recovered and Damaged by Arson, 1988

Table 4 shows the value of property stolen, recovered and damaged by arson for each county and law enforcement agency reporting UCR data. All values shown in Table 4 are reported data; no estimates are performed on partial or missing figures.

In past years, Table 4 has presented the percentage of total clearances involving only juveniles. However, both because this measure minimized juvenile involvement in clearances and a relative lack of interest in these data, this table has been replaced in the 1988 UCR report. However, juvenile clearance figures for individual agencies are available upon request.

Arrests by County and Law Enforcement Agency - 1988

Tables 5 through 8 present data on adults and juveniles arrested by Wisconsin law enforcement agencies during 1988. The tables present the total number of arrests, the total numbers of Part I and Part II arrests, and the number of arrests for each Part I and Part II offense separately, for each reporting agency. Information on adults is presented in Tables 5 and 7, information on juveniles in Tables 6 and 8.

As indicated in the introduction to this report, data are not available for all 12 months of 1988 for every reporting agency. In the following tables, as in Tables 1 through 4, the number of months of data available for each reporting agency is listed. Although only the known data are presented for each jurisdiction, an estimated yearly total can be calculated for any jurisdiction with less than 12 months of data reported. The estimated totals can be calculated by multiplying the number in the table by a correction factor which can be obtained by dividing 12 by the number of months of data reported. (Thus, if 11 months of data are presented for an agency, for example, the agency's figures should be multiplied by 12/11, or 1.09). As is the case in other tables, the more months of data reported, the more accurate will be the yearly estimates. Estimates based on a small number of months of reported data should be interpreted cautiously. This estimation procedure should also be applied with caution when the number of arrests is small.

The following tables show, for each county, county total arrests for each offense. For those counties in which not every jurisdiction reported 12 months of data for 1988, the county totals shown are estimates. These estimates were obtained as in Table 1, by calculating and summing the estimated annual total for each jurisdiction within the county. As in the previous table, when estimates are used for county totals, the notation "(EST)" follows the "County Total" label.

At the end of each table there are statewide totals of the reported arrests in each category and estimates of the actual statewide totals. The estimated totals were obtained by calculating the estimated yearly totals, as described above, for each reporting agency with less than 12 months of data and summing the estimates for these agencies and the reported figures for the other agencies.

These tables also contain population figures for each jurisdiction. Tables 5 and 7 contain adult population figures. Tables 6 and 8 contain juvenile population figures. These adult and juvenile figures were derived from the 1988 Department of Administration (DOA) population estimates, Official Population Estimates for 1988, using adult and juvenile population proportions provided in the 1980 census and updated with 1983 DOA estimates. The population figures presented for county sheriffs' offices are the county populations minus the populations of any municipalities in the county for which UCR data are reported separately. These figures can be used to calculate arrest rates for any of the jurisdictions in the State. Arrest rates are calculated by dividing the number of arrests by the relevant population and multiplying the result by 100,000. This rate per 100,000 is comparable across jurisdictions of varying sizes.

Statewide Arrests, by Gender and Offense

The first and second of the following tables present statewide data on adult and juvenile arrests by gender during 1988. Like other state and county level data presented in this report, these tables present estimated totals. Note that the state total in these listings may differ slightly from the corresponding totals shown in Tables 5 through 8. This is because of small differences in the procedure used to make estimates of missing data in the two types of tables.

Statewide Property Information

The third table, Property Stolen and Recovered by Type of Property, shows the monetary value of property both stolen and recovered by category of property for the entire State in 1988. The table also shows the percent of value recovered for each type of property.

Number of Full Time Law Enforcement Employees in Wisconsin as of 31 October, 1988

The data in this table come from a yearly survey conducted each fall by the Federal Bureau of Investigation. For every jurisdiction, it shows the number of sworn law enforcement employees (male and female), the number of civilian employees (male and female), and the total number of employees for every UCR jurisdiction. In addition, the table lists the total population for each jurisdiction, and both the number of law enforcement employees and the total number of employees per 1,000 population. It should be noted that figures for the number of officers per 1,000 population for some agencies are absent since no permanent resident population is assigned (e.g., UW Campus Security Agencies, DNR, State Patrol).

GLOSSARY

ADULT: A person 18 years of age or older.

ARREST: Taking into physical or other legal custody for commission of an offense in the local reporting jurisdiction. An arrest has occurred when a law enforcement officer detains a person with the intention of seeking charges against them for a specific offense and a record is made of the detention (see p. 60, Uniform Crime Reporting Handbook). Arrests for all criminal offenses are scored. Arrests for ordinance violations are included. Arrests for traffic offenses, with the exception of driving under the influence of intoxicants, are not scored. Included are those persons released without having been formally charged. (See Juvenile Arrest.)

ARREST RATE: The number of arrests for a particular offense, or group of offenses, per 100,000 population. The formula is:

$$\frac{\text{Number of Arrests}}{\text{Population}} \times 100{,}000$$

Arrest rates per population unit are employed to remove the effects of differing sizes of law enforcement service areas, permitting the examination of arrest on an equalized population basis. "Per 100,000 population" is generally utilized to preclude rates for infrequently occurring arrests from being expressed as unmeaningfully small numbers.

CLEARANCE: An offense is cleared, or solved for crime reporting purposes, when at least one person is arrested, charged with commission of the offense and turned over to the court for prosecution. Provision is also made for clearance in certain "exceptional" situations (see p. 42, Uniform Crime Reporting Handbook).

CLEARANCE RATE (TOTAL): The number of clearances divided by the total number of offenses, expressed as a percent. The formula is:

$$\frac{\text{Number of Clearances}}{\text{Number of Offenses}} \times 100\%$$

Offenses are reported as they become known to law enforcement agencies. Clearances are scored as they are made. Therefore, it is possible for the clearance rate to exceed 100 percent for a time period. Both clearances by arrest and exceptional clearances are included.

CRIME FACTORS: Historically, the causes and origins of crime have been the subjects of investigation by many disciplines. No definitive conclusions have yet been reached; many factors affect the volume and type of crime that occurs from place to place. Caution should, therefore, be exercised in comparing statistical data of individual communities or counties solely on the basis of their populations.

More appropriate use can be made of the statistics by relating the experience of a particular area to group averages, or by employing a ranking procedure, and encompassing both crime and other socio-economic information.

CRIME INDEX: The total of eight serious offenses used as an indicator of crime. Crime Index offenses are murder and nonnegligent manslaughter, forcible rape, robbery, aggravated assault, burglary, theft, motor vehicle theft and arson. The first four of these are referred to as violent crimes, and the latter four as property crimes. Definitions of each of these offenses are given in the section "Statewide Index Offenses and Arrests."

JUVENILE: A person 17 years of age or younger.

JUVENILE ARREST: For purposes of Uniform Crime Reporting, a juvenile should be counted as "arrested" when the circumstances are such that if he or she were an adult, an arrest would be tallied (see Uniform Crime Reporting Manual, p. 60). All violations by juveniles where some police or other official action is taken beyond a mere admonishment, including status offenses, are included. Law enforcement contacts with juveniles where no offense has been committed are not scored as arrests. Juveniles taken into custody for their own protection, such as in neglect cases, are not scored as being arrested if they have not committed an offense. (See Arrest)

JUVENILE CRIME: The only measure of juvenile crime available through Uniform Crime Reporting is the number of juvenile arrests (number, rate, and percentage of total arrests).

OFFENSE RATE: The number of known offenses per 100,000 population. The formula is:

$$\frac{\text{Number of Offenses}}{\text{Population}} \times 100{,}000$$

Offense rates per population unit are employed to remove the effect of differing sizes of law enforcement service areas, permitting the examination of reported crime on an equalized population basis. "Per 100,000 population" is generally utilized to preclude the rates for infrequently occurring offenses from being expressed as unmeaningfully small numbers.

More specific crime or victimization rate measures may also be utilized, such as residential burglaries per 100,000 residences, motor vehicle thefts per 100,000 registered vehicles, or forcible rapes per 100,000 females in typically victimized age groups.

PART I OFFENSES: The eight index crimes in addition to manslaughter by negligence.

PART II OFFENSES: All crime categories not already designated as Part I, excluding all traffic violations except Operating a Motor Vehicle While Intoxicated.

PERCENT CHANGE: The formula is:

$$\frac{\text{Value in Current Period - Value in Base Period}}{\text{Value in Base Period}} \times 100\%$$

POPULATION: Totals as well as juvenile and adult sub-totals are based on Official Population Estimates for 1988, Wisconsin Department of Administration, Demographic Services Center.

STATUS OFFENSES: Offenses which are only offenses when they are committed by a juvenile. For purposes of the Wisconsin UCR Program, status offenses consist of curfew violations, runaways, and liquor law violations.
